(54) Title: APPARATUS FOR USE IN A GAME OR A DISPLAY

(57) Abstract: Apparatus for creating a number of display im-
ages comprises a first rotating element provided with a plural-
ity of mounting means, each of said mounting means rotat-
ably carrying one or more second rotating elements each pro-
vided with a number of display surfaces, in which the mount-
ing means are arranged such that they define a shape with sub-
stantially straight edges, and in which two or more second ro-
tating elements can combine to create a changeable display
surface substantially parallel to each substantially straight edge
of said shape, and in which in use each second rotating element
is rotated independently of all other second rotating elements.
